

## Helsingin kaupunkitilaohje

# in English: Colour palette

<https://kaupunkitilaohje.hel.fi/kortti/colour-palette/>

Four colours define the Sense of Helsinki, the most common of which is dark grey RAL7021. Instructions for furniture and structure-specific use of colours can be found in the Design Manual of Street Furniture in Helsinki.

### **Dark grey RAL 7021 is the main colour of Helsinki**

Dark grey is the colour of endurance and hardness. Dark structures frame space more efficiently than lighter structures, because they contrast more strongly with their surroundings. It is easier to create the effect of unity in a space with darker hues, because dark structures are more noticeable than light structures.
